Center for Land Use
Education and Research, and
Connecticut Department
of Environmental Protection.
Imagery is from the
USDA National Agricultural
Imagery Program 2008.

Wrack Lines Magazine Vol. 10:2 Connecticut Sea Grant/UConn

What if the polar ice melted?

If all the polar ice melted, it is estimated
sea level would rise by 220 feet (67meters).
The coastline of Connecticut would be
significantly changed.
